## HOW TO USE THE DEWEY DECIMAL SYSTEM

The Dewey Decimal System coordinates materials on the same subject and on related subjects to make items easier to find on the library shelves. This system organizes information into 10 broad categories. Each major category is divided into 9 sub-categories. Each sub-category is further divided into 9 specialized topics that can be broken down even further by adding decimals. Each division becomes more specific.

These divisions help decide where a book “belongs” in the Dewey system, and helps us to find a book on a shelf. For example, books about Japan are given the “call number” 952. To see what books your library currently has on Japan, go the non-fiction shelves and find the books that have 952 as part of their call number.
